National Institute for Research in Education

**A report on the national salon for Higher Education and Scientific
Research and research products**

June 28th-29th

Under the high patronage of Mr. the Minister of Higher Education and Scientific Research, a national salon for Higher Education and Scientific Research and research products was organized at the University of Houari Boumediene for science and technology which lasted from June 28th-29th, 2022 with the participation of different university institutions and research centers across the country.

The salon was opened in its first day the national anthem followed by a word addressed by Mr. the Rector of University of Houari Boumediene for science and technology in which he welcomed the honorable attendees. After that, the Minister of Higher Education and Scientific Research addressed a word in which he praised those in charge of the salon wishing success for this session.

The National Institute of Research in Education made sure to participate in this salon through presenting different newsletters and journals published from it and presenting five posters of research projects. The responsible of the stand presented a PowerPoint display of the scientific activities outcome of the Institute from 2020 to date. At the end, the media library which is considered a qualitative addition of the national education sector in Algeria was defined.

This event is an opportunity for the National Institute of Research in Education to interact and get in touch with representatives of universities and research institutions acting across the national territory.
