Report of the train-the-trainer session on "The Technological Foundations of Scenario-Based and Media-Based Educational Content Production"

November 19, 2023

On November 19, 2023, under the supervision of the Director of the National Institute for Research in Education, Prof. Radia BERNAOUI, the work of the training of trainers session on the topic "The technological foundations of the production of pedagogical content based on scenarios and media supports for the benefit of educational actors" (inspectors) and a group of permanent researchers of the Institute began. This session is part of the activities of the project "Health containment and its effects on education in Algeria, towards a national digital platform of educational resources for sustainable development", supervised by the National Institute for Research in Education in partnership with UNESCO.

The training session was led by Dr. SEFADJ Zain Eddine from the University of Continuing Education in Algeria, as well as audiovisual technicians. It was scheduled into a main session divided into three training sessions, addressing both the theoretical and practical aspects of media design, script writing, setting up a mobile studio and post-production.

At the end of the training session at the INRE headquarters, for the benefit of educational actors, the Director thanked the participants for their commitment to the success of this session and wished them success and fulfillment in their future opportunities.
